

**ZAF** significa un sistema modulare completamente personalizzabile e, grazie alla piantana brevettata, sempre aggiornabile e riconfigurabile nel tempo.

Una vasta gamma di accessori e finiture, costantemente ampliata con l'evolvere dei prodotti, e la competenza di un Ufficio Tecnico Commerciale dedicato, rappresentano gli strumenti migliori per rispondere ad ogni esigenza espositiva.

***ZAF** is synonymous with fully personalised modular display systems, featuring patented uprights that ensure layouts can be updated and reconfigured at any time in the future.*

*A huge range of accessories and finishings, extended on an ongoing basis as products evolve, and the expertise of a special Sales and Technical Office provide the best way to satisfy all display requirements.*

Con oltre 50 anni di esperienza, 15.000 metri quadri coperti, 110 addetti, ed un consumo annuale di oltre 9.000 tonnellate di metallo destinato alla trasformazione in componenti d'arredo, **ZAF** è una vera realtà internazionale in continua e progressiva espansione verso nuovi mercati. Un successo reso possibile dalla capacità di rispondere alle esigenze della distribuzione contemporanea, dal piccolo negozio specializzato alla filiera del franchising, ai nuovi modelli urbanistici dove abitazioni, punti vendita e servizi costituiscono un vero sistema integrato.

*With more than 50 years' experience, 15,000 square metres of covered factory space, 110 employees and annual consumption of about 9,000 tonnes of metal for transformation into display units, **ZAF** is a truly international player, constantly expanding into new markets.*

*A success made possible by the company's ability to satisfy modern distribution needs, from small specialist retailers and franchise chains to new urban planning schemes where homes, points of sale and services are integrated to form part of the same system.*

### Carichi ammessi per scaffalatura a parete e gondola

#### Permitted loads for wall and gondola shelving

Il carico ammesso si intende uniformemente distribuito su ogni piano e in modo decrescente verso l'alto. The permitted values refer to loads which are uniformly distributed across each shelf and decrease from bottom to top.

In caso di carico bilaterale (gondola) si possono applicare a destra e a sinistra gli stessi carichi ammessi per la parete. In the case of bilateral loading (gondola shelving), the permitted loads for wall shelving may be applied to both right and left sides.

Per aumentare i carichi ammessi delle piantane a parete, si suggerisce di fissarle, purchè i sistemi di fissaggio e la parete siano in grado di sopportare in modo sicuro i carichi supplementari. Fix the uprights to the wall to increase the permitted load, provided that the wall and anchoring system can withstand the extra load within safety limits.

### Portata dei vari tipi di piano

#### Load capacity of the various types of shelves

profondità piano (cm) shelf depth (cm)	25	30	35	40	50	40*	50*	60	70	80

\* piano con mensole nervate  
shelf with ribbed brackets

La portata dei piani è calcolata con carico uniformemente distribuito su un piano con lunghezza da 100 cm. The load-bearing capacity of shelves is calculated for a uniformly distributed load across the entire surface.

### Portata dei vari tipi di mensola

#### Load capacity of the various types of brackets

profondità mensola (cm) bracket depth (cm)	25	30	35	40	50	40*	50*	60	70	80

	12 cm	1060	890	790	650	550	480	420

La portata delle piantane corrisponde alla somma ammessa del carico di tutti i piani escluso quello di base. Per profondità diverse, fare la somma di queste e dividere per il numero dei piani; ottenuta così la profondità media, riferirsi alla misura più vicina. Permitted sum of loads on all shelves, excluding the base shelf. For shelves of differing depths, add all the depths and divide by the number of levels. After calculating the average depth, locate the value closest to it.
